Harley-Davidson® Saddlebag Mounting Hardware Installation Instructions

1. First open the saddlebag lid and remove both of the saddlebag quick release pins.
2. Remove the saddlebag from the bike.
3. Remove the stock retaining clips by inserting a small flat head screw driver between the frame on the bike and the retaining clip. They will slide off fairly easily.

4. Next, take your new U-clip and snap it in the place of the stock retaining clip.

5. Repeat process for the adjacent retaining clip in this saddlebag. Replace the saddlebags.
6. Take one of the LocEzy® bolts and slide on a lock washer, then the original flat washer from your Bailhead quick release pin. (2016 LocEzy use flat washer provided.) Insert it thru the rubber grommet. Next slide the nylon retaining ring onto the bolt. This will hold the LocEzy® to the saddlebag when removed. Screw the bolt into the U-clip only finger tight, as you may need to adjust the saddlebag slightly side to side for the first time to get the new U-clips into the final position.

7. Repeat the process in the adjacent bolt hole. Tighten them down until the lock washer is compressed completely and the rubber grommet is compressing. Tighten them like you would a bolt with a wrench, tight, only use your hand. Move over to the other saddlebag and repeat the procedure.
